SUMMARY

Full-Stack Developer with 5+ years building and supporting enterprise web applications end to end — React and TypeScript on the front end, Python (FastAPI) and Java (Spring Boot, NestJS) services on the back end, and SQL/NoSQL data layers on Azure. Comfortable moving between codebases, stacks, and client environments, with a track record of shipping production systems, integrating cloud and identity services (Azure AD, Microsoft Graph), and troubleshooting across frontend, backend, and database layers. Holds a valid Canadian Open Work Permit and is available to start immediately in Calgary — no sponsorship required.

SKILLS

Languages JavaScript · TypeScript · Python · Java

Frontend React · Angular · React Native · Material UI · HTML · CSS

Backend & Integration REST APIs · FastAPI · Spring Boot · NestJS · Microsoft Graph API

Cloud & DevOps

Azure App Service · Azure Functions · Azure AD · Managed Identity · Key Vault · Cosmos DB · Azure DevOps · CI/CD (Jenkins, Azure Pipelines)

Databases Azure SQL · DB2 · MongoDB · MariaDB · SQL

Practices RESTful API design · RBAC · Microservices · System integration · Technical documentation

EXPERIENCE

Analyst Programmer

Mar 2021 – Jan 2025

Arch-Partnership Limited

- Developed digital insurance applications supporting the end-to-end policy application journey, from product selection and electronic forms to e-signatures, PDF generation, and online payments.
- Implemented frontend and backend validation rules based on insurer-defined business requirements, including customer eligibility, data freshness, and policy compatibility checks.
- Integrated third-party APIs to retrieve customer and policy information and determine whether application details required updating or resubmission.
- Designed REST APIs and delivered features across React, Angular, React Native, Java Spring Boot, and NestJS applications.
- Participated in requirement refinement by assessing technical feasibility, identifying edge cases, breaking user stories into implementation tasks, and providing effort estimates.
- Collaborated with project managers and QA engineers to define acceptance criteria, review test cases, and resolve defects throughout the delivery cycle.
- Supported CI/CD deployment, performance testing, and application optimization using Jenkins and Azure Pipelines.

System Developer

May 2025 – Present

Eastech System Limited

- Developed and maintained an enterprise case-management platform using React, TypeScript, Python, FastAPI, Azure Functions and Microsoft SQL Server.
- Built production case-handling workflows covering case pickup, assignment, reassignment, takeover, bulk assignment, bulk closure and status-history tracking.
- Designed and developed a full-stack, database-driven access-control module supporting individual user assignment to multiple application roles and consolidated feature permissions.
- Integrated Microsoft Entra ID authentication through MSAL and JWT, using verified user identity claims within backend services.
- Developed an administration portal for managing application users, roles, feature permissions, AI classification categories, tags, keywords and prompt configurations.
- Integrated Microsoft Graph API to retrieve and manage organizational user information required by application-access and reporting workflows.
- Implemented frontend interfaces, backend APIs and database logic for reviewing AI-generated classifications, summaries, urgency levels, tags, keywords and recommended actions.
- Optimized case-list performance by improving SQL query structures, pagination, record-count processing and backend data-enrichment workflows.
- Configured Azure resources and CI/CD pipelines to support automated deployment across development, testing and production environments.
- Investigated and resolved application, database, API and production deployment issues across the full technology stack.

EDUCATION

Associate of Engineering

2013 – 2015

Hong Kong Community College (HKCC)

BEng in Computer Engineering

2015 – 2021

Hong Kong University of Science and Technology (HKUST)
